

GREGORY A. ROEPER

roeperg@gmail.com | LinkedIn Profile | Atlanta, GA

**SENIOR DATA SOLUTIONS ARCHITECT | CLOUD DATA ENGINEERING | GENERATIVE AI
AUTOMATION | MARINE CORPS VETERAN**

PROFESSIONAL SUMMARY

Senior Data Solutions Architect with deep expertise in **Cloud Data Migration, Data Engineering, and AI-driven automation**. Over 20 years of success designing, modernizing, and optimizing large-scale **AWS, Snowflake, and Spark/Hive** data ecosystems. Advanced proficiency in **ETL/ELT pipeline development, Python automation, API integration, and enterprise BI/Reporting** (Qlik Sense, NPrinting, Tableau).

A hands-on technical leader leveraging **Generative AI (Gemini, Claude, ChatGPT, Cursor)** to accelerate development, produce well-documented code, enhance data quality, and deliver real-time operational and financial insights. Recognized for building scalable data architectures, modernizing legacy systems, and driving measurable business impact across analytics, procurement, and sales operations.

TECHNICAL EXPERTISE

Cloud & Data Engineering

- AWS (Redshift, RDS, S3), Snowflake, Spark/Hive Data Lake, Data Warehousing, Data Modeling, Oracle, Sybase, GitHub, CI/CD, Data Pipelines, Data Governance, Metadata Management.

BI, Analytics & Automation

- Qlik Sense (Development & NPrinting), Tableau, Alteryx, QuickBase, Smartsheet, Tidal Automation, ETL/ELT, Predictive Analytics, KPI Dashboards, Data Visualization, Workflow Automation.

AI, Scripting & Development

- **Generative AI (Gemini, Claude, ChatGPT, Cursor)**, Python, SQL/HQL, REST API Integration, JSON/YAML/XML, Agile SDLC, Atlassian JIRA, Prompt Engineering, AI-assisted development, LLM-driven automation.
-

PROFESSIONAL EXPERIENCE

Business Analyst (Data Analytics) | Intuit – Global Sourcing & Procurement

Atlanta, GA | Aug 2024 – Present

- **AI-Driven Automation:** Use Generative AI (Gemini, Claude, ChatGPT, Cursor) to accelerate Python development, automate Qlik Sense processes, and produce high-quality technical documentation.
 - **Migration Lead:** Directed the migration of a large Alteryx workflow library into Qlik Sense, enabling centralized spend analytics, vendor performance reporting, and automated NPrinting distribution.
 - **Data Product Development:** Designed a supplier performance scoring model used as the foundation for an enterprise preferred-vendor program.
 - **Application Ownership:** Administered and enhanced a mission-critical QuickBase application supporting contract lifecycle management and spend visibility.
-

Solutions Architect | Apple (via WiPro)

Remote | Jan 2023 – Nov 2023

- Architected a full **Snowflake + Tableau** data pipeline integrating Workday HR data into a new operational data mart.
 - Defined data models, ingestion patterns, and transformation logic to support scalable analytics and executive reporting.
-

Business Analyst | FINRA (via ConsultNet)

Remote | Jun 2022 – Aug 2022

- Conducted requirements gathering, workflow analysis, and technical documentation for regulatory systems modernization initiatives.
-

Staff Technical Data Developer | Intuit Inc.

Fredericksburg, VA | Aug 2008 – Apr 2022

- **Cloud Migration Leader:** Built and maintained interim Linux and Oracle RDS environments to support a multi-year migration to AWS.

- **Data Architecture:** Designed and implemented a unified Oracle/Spark Hive data mart serving as the authoritative source for sales performance analytics across 200+ agents.
 - **Advanced ETL & API Engineering:** Developed complex Alteryx workflows with embedded Python and REST API integrations for automated, secure partner data ingestion (e.g., PartnerStack).
 - **Real-Time Operational Reporting:** Built a web-based, real-time call-queue monitoring system for agent workflow and adherence tracking.
 - **Predictive Modeling:** Created Alteryx-based forecasting models for commission impact analysis and performed audit analytics to ensure compensation accuracy.
-

EARLIER CAREER HIGHLIGHTS

Technical Reporting Lead | Sprint/Nextel

Overland Park, KS / Herndon, VA | Jan 2002 – Feb 2008

- Led a 12-person reporting team during the Sprint/Nextel merger.
- Re-engineered reporting workflows, reducing daily processing time from 5 hours to under 20 minutes.

Billing System Developer | BellSouth Cellular / Cingular Wireless

Atlanta, GA | Apr 1997 – Jan 2002

- Developed C++ interfaces to Sybase/Oracle billing systems, implementing new logic for SMS and rollover-minute plans.
-

EDUCATION

- **University of South Florida – College of Engineering**
- **St. Petersburg College – Computer Science**
